

K-LOVE is a family friendly; positive, encouraging and uplifting station that my family and I listen to daily, whether at home, work or in the car. We are able to visit family in other states and still be able to listen to this station.

I am tired of negative broadcasting; hateful, rude and horrible language that children have no business listening to. They do not need the negativity nor the distasteful jokes and language used.

I believe the service provided by K-LOVE is awesome! Again, it is positive, uplifting, encouraging and family friendly. We actually need more of these types of stations in place of the other stations currently on the air. There is enough negativity in the world -- would be so much better to have more positive influences as opposed to the negative!
